SUMMARY

Entry-Level Full Stack Developer with knowledge of such programming languages as JavaScript, Python, HTML5, and CSS3. Hands-on experience in developing web apps from conception to launch. Solid understanding of responsive design principles, backend technologies, databases. Challenged to bring technical expertise and teamwork to drive the creation of innovative web-based solutions that meet the needs of modern users in a dynamic environment.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Python, SQL
- **Front-End Technologies:** HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Responsive Web Design, DOM Manipulation
- **Back-End Technologies:** Node.js, Express.js, REST APIs, Flask / Django
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, VS Code, Postman, Chrome DevTools

WEB DEVELOPMENT PROJECTS

Indian Sign Language Recognition System

- Technologies: Python, JavaScript, HTML5, CSS3, REST APIs
- Built a full-stack assistive web platform to convert sign inputs into readable text in real time.
- Structured a responsive, mobile-first user interface using modern CSS and semantic HTML to ensure accessibility standards.
- Implemented asynchronous client-side API requests to transmit input data to the Python backend with minimal latency.
- Tested routes, API endpoints, and input processing pipelines to ensure stable application performance across different screen sizes.
- <https://islrs.netlify.app>

Smart Power management System

- Technologies: JavaScript, Python, Chart.js, HTML5, CSS3, SQL
- Developed a dynamic web dashboard to track, visualize, and analyze power consumption metrics and load balance logs.
- Integrated interactive data visualization tools using JavaScript charting libraries to display daily load profiles and peak usage trends.
- Built server-side scripts to process raw sensor and log data into structured JSON formats for dashboard consumption.
- Designed database schemas in SQL to store operational records, user sessions, and historical performance benchmarks.

EDUCATION

PET Engineering College, Tamil Nadu

Bachelor of Engineering (B.E.) in Electrical & Electronics Engineering

Graduation: 2026

- **Engineering Foundations:** Problem Solving & Analytical Thinking, Algorithmic Logic, Mathematical Modeling, Circuit & System Logic
- **Self-Directed Technical Focus:** Data Structures, Object-Oriented Programming (OOP), Relational Databases.

HACKATHONS & CERTIFICATIONS

- **Niral Thiruvizha Hackathon:** Built and deployed a functional web-based prototype within a limited sprint to address real-world problem statements.
- **Spark-Wars:** Competed in technical events focused on problem-solving, algorithmic logic, and code optimization.
- **Wadhwani Foundation Ignite Program:** Completed structured training on project execution, product design, and software planning workflows.
- **TCS National Qualifier Test (TCS NQT – IT):** Secured **61.68% aggregate score** across Cognitive, Advanced Reasoning, and Programming assessments (May 2026).
